The following comments were shared by attendees to the October 15th Viewpoint neighborhood open house.

Viewpoint's Parks and Recreation

- Promote locating art at strategic locations throughout the neighborhood including parks, neighborhood entryways, and along W Lk Samm Pkwy

Plot art is wonderful and helps create community identity, should include some modest component of art funding in every public project
Don't waste $
Ditto
Waste and eye clutter, don't do it!
As long as (it) free
What a waste of $. We have beautiful trees already.
Don't' pay $ for this. Set up areas where artists can put their "projects" for public view for finite period of time (no charge, no fee)
No $ for art, there are more important things
Why would we spend tax dollars on "locating art". Let's use our dollars on more important aspects of need(ed) improvements.
No art, don't do what Bellevue did with the fish!

- Require non-motorized connections, where opportunities are supportive, as part of <u>new</u> development, that provide linkage to schools, other developments, parks and open space, and other non-motorized connections.
    - Connections at ends of cul-de-sacs and where motorized and other points of access are 600' or greater in distance from one another.

Suggest but not require
God idea
Improve parking so we don't have strangers parking outside our house every day in summer

- Promote establishing formal non-motorized connections between parks including sidewalks, trails, and paths such as a program that helps transition trails for interested property owners.

New crossing at entrance of park off 38th?
Great idea to promote ped & bike usage (also arrow to point above)

- Support neighborhood-oriented programs, events, and amenities within Viewpoint's parks including community-based maintenance and stewardship.

Provide parking & traffic improvement first
Also community based programming. Foster community opportunities to create Viewpoint "culture" by host events and work parties.

- Promote the creation of small parks, gathering places, and other public amenities throughout the neighborhood including benches and picnic tables.

That would be nice
Yes!
I agree!
Acquire and protect open space not in public ownership
On whose property?
We have plenty of parks!
Yes

- Promote enhanced monitoring and maintenance of parks and park facilities during high seasonal use.

Good job done keeping park clean. Must tow cars to enforce parking.
Yes! Particularly in summertime
Yes
Ok

- Support ongoing collaboration and communication with neighborhood in consideration of Idylwood Park's:
    - Long-term monitoring;
    - Maintenance;
    - Parking;
    - Capacity; and
    - Uses including amenities and programs.

Continue to upgrade & maintain this park
Need new solutions (arrow to parking) overflow lot somewhere with shuttle
Add parking where the old house was removed at Idylwood as it is unsafe to leave our street in the summer with cars parked on west side of WLSP
Enforce parking during park's high use, along WLSP

- Recognize the priority of the Viewpoint neighborhood regarding Idylwood Park's long-term sustainability as a neighborhood park and asset.

Yes!
Please clarify, we aren't planners
What does this mean?
Not another Marymoor

- Promote a neighborhood gathering place such as a community building in the Viewpoint neighborhood, with consideration of existing and planned structures at Idylwood Park.

Waste of $
Not commercial

I agree
Yes
No, we don't need more buildings in the park!
Would love that!
No
Yes! Look at Robinswood House, revenue source, parking however…
You were stupid to tear down the existing house!

- Promote increased parking enforcement and consider other parking management techniques such as local parking permits, limited duration parking, and increased ticketing of violations. Coordinate with Audubon Elementary School concerning events that create overflow parking demand.

Littletree is NOT Audubon's overflow parking area!
If you currently live at or near the entrance to Littletree there is Audubon traffic overflow everyday, how about walking those kids to school, promote exercise!

- Provide signage that notifies park visitors of safe water and wildlife practices.

Mark the stormdrains only
Stop adding signs in the park!

- Consider the construction of a restroom facility at Cascade View Park.

No no
Try honey bucket first to see if need is great enough to warrant

- Consider the construction of a restroom facility at Viewpoint Park.

Doesn't seem very needed?
No no
no

- Continue to work with the Parks Department to promote enhancements and stewardship of Viewpoint Open Space.

Sign for Viewpoint Open Space

- Support future expansion, as feasible, to Viewpoint Park.

No
Look for opportunities to functionally expand Marymoor Park, particularly north of Lk Samm Pkwy and near 168th Ct NE
Add a boat launch at Idylwood. That would be a reasonable use of tax payer $.

- YOUR ADDITIONAL COMMENTS:

The parking situation at Idylwood park is terrible especially during the summer when the beach is in heavy use. As a direct consequence, hundreds of cars park in the neighboring streets and create huge parking problems for the residents around the park. Expand parking lots at Idylwood, don't pass it onto the neighbors as their problems.
