The following comments were shared by attendees to the October 15th Viewpoint neighborhood open house.

The Viewpoint Neighborhood Plan
"3rd Document"

The Neighborhood Plan "3rd Document", composed of a list of projects, wishes, and concerns, is a feature of the neighborhood plan package. It is tended to by the neighborhood following adoption of the neighborhood plan package and reviewed with subsequent neighborhood plan updates.
These items can be flagged for future programs or projects. They generate conversation during the neighborhood plan review process with Redmond's City official.
The Viewpoint CAC considered all aspects of living, working, and recreating in the neighborhood. These are the items that they wish to include in the "3rd Document".

- PLEASE HELP US BY ADDING TO THIS LIST.
  - Lighting and seating at transit stops

How about adding transit stops?

  - Energy efficiency and alternative power for street lights

Consider the new LED streetlights
Yes, but manage excel ambient light/spillover

  - Storm drain maintenance awareness

  - Solid and yard waste awareness

Yes, I think out solid waste management and recycling is great and should be further promoted

  - Coordinate with City of Bellevue regarding their upcoming W Lk Samm Pkwy improvements (scheduled for 2012-2016)

Yes
This is a "no-brainer"

  - Traffic calming along W Lk Samm Pkwy, specifically at intersections

This will greatly increase congestion
I agree
I agree
No speed bumps

  - Review citywide tree ordinance in consideration of native plant species, greater flexibility, defining the purpose of trees, allowing fruit trees, and handling non-native species removal and replacement

Yes, enhanced education component

- Citywide management program for significant and landmark trees such as partnerships with property owner for the maintenance of trees, coordination with arborists, and financial assistance

Yes, if we're required to keep them, City should assist

- Safe water practices, education, awareness

Yes, will ultimately have to do as part of clean water act compliance, NPDES start now

- Car washing awareness

Yes
Yes
No, no, no

- Dock maintenance awareness
- Wildlife education and awareness

- Walkway and pathway clearance:
- Trimmed vegetation
- Waste receptacles
- Sidewalk sweeping

There are areas on the eastside of 172nd where you can hardly walk on the sidewalk because of foliage overgrowth
I agree
A notice to the rules could be mailing out and then posted on the website

Additional comments on the 3rd Document

To prevent widespread tree cutting, the tree cutting companies should get city permits for each tree to be cut down. Too many trees are cut for no good reason
Do not put a traffic light at WLSP and 24th
Yes
do not
no light
fish stream awareness
traffic calming in neighborhoods
bring back the overhead "crosswalk" sign near Idylwood. It worked great and was a landmark. Not everyone uses the flashing lights. It lit up the crosswalk and brought greater awareness for drivers.
I agree
Good point, lots of speeding on the parkway and 24th
It is OK, "traffic calming" wastes space and gas
Stop requiring red cedar and large leafy tree plantings in our view corridors, its viewpoint

The tree ordinance is to restrictive and will one day be tested in court (infringements on property owners rights) I plant and like trees too
Lots of speeding on WLSP. If you put a curb between the bike land and car traffic, it will make it safer.
Please add some lighting on NE 36th street, it is so dark.
No single light.
