^{*} "Severely cost-burdened" means a household spending more than 50 percent of its income on housing costs.

Source: U.S. Census Bureau (2002, 2010).

Exhibit I:

"Jobs-housing balance" indicates the ratio of housing demand from local workforce to the local supply of housing. A ratio of 1.0 means there is an amount of housing equal to the demand for housing from the local workforce. A ratio greater than 1.0 means that local employment generates a demand for housing greater than the number of housing units. Housing demand is estimated by 1.4 jobs per household. Source: ARCH.

The dataset for March of each year is presented here as a representative month when seasonal fluctuations are minimized. The unit of measurement is jobs, rather than working persons or proportional full-time employment (FTE) equivalents; part-time and temporary positions are included. To provide more accurate workplace reporting, PSRC gathers supplemental data from the Boeing Company, the Office of Washington Superintendent of Public Instruction (OSPI), and governmental units throughout the central Puget Sound region (PSRC). Source: Puget Sound Regional Council (2010).

⁽¹⁾ Includes surveyed housing and senior housing with services (e.g. nursing homes, assisted living, congregate care).

Other notes: Affordability based on survey of new attached housing by ARCH. Does not include special senior housing or housing receiving public financial support.

Survey affordability not available for all attached housing units.

Newcastle data begins in 1998. Clyde Hill, Kenmore, and Sammamish data begin in 2001.
